Education

Georgia Institute of Technology — Atlanta, GA
Bachelors of Science in Computer Science, Minor in Psychology

May 2021

Professional Summary

Software engineer with 5+ years of experience building secure, scalable, and cloud-native applications. Skilled in full-stack development, automation, and DevOps tooling. Passionate about designing maintainable systems and improving developer productivity through human-first system design.

Experience

NBCUniversal — New York, NY
Cyber Systems Engineer

Jun 2024 - Present

- Lead developer and maintainer of internal software that helps provide and administer cyber security tooling, supporting organization-wide secure coding initiatives.
- Architect and design cloud systems that optimize cost, developer experience, and maintainability.
- Collaborate across engineering teams to integrate application security workflows into CI/CD pipelines and provide first line of defense support for the NBCU ecosystem
- Enhance system scalability, reliability, and developer usability to ensure best practices and good security posture internally
- Stack: Python, Golang, Typescript/Javascript, Terraform, AWS, Docker, GitHub Actions, Snyk

NBCUniversal — New York, NY
Associate Cyber Security Software Engineer

Jul 2023 – Jun 2024

- Designed and deployed containerized and serverless applications to automate security operations
- Managed AWS resources via Terraform and built automated deployment pipelines with GitHub Actions
- Focused on fault-tolerant, low-maintenance design principals for long-term system stability
- Stack: Python, TypeScript/JavaScript, Terraform, AWS, Docker, GitHub Actions

NBCUniversal — New York, NY
Media Tech Associate

Jul 2021 – Jul 2023

- Designed and built multiple fullstack Node.js web applications (REST APIs and web UIs)
- Refactored and modernized existing Typescript monorepo, improving CI/CD reliability and developer experience
- Built automated AWS deployment pipelines and containerized services for faster iteration cycles
- Supported cybersecurity teams by contributing to threat modeling and internal vulnerability reviews
- Authored detailed internal documentation and managed post-deployment support
- Stack: TypeScript/JavaScript, React, Angular, AWS, Terraform, Docker, GitHub Actions

Nead Werx — Atlanta, GA
Front-End Intern

Aug 2018 – Dec 2018

- Designed and implemented new UI features in enterprise environment using vanilla JavaScript
- Translated wireframes and mockups into responsive, production-ready interfaces
- Stack: JavaScript, Figma, Adobe Illustrator

GE Aviation (Avionics) — Miami, FL
Software Engineering Intern

May 2018 – Aug 2018

- Built a customer-facing web application with REST API to monitoring flight recording data in real time
- Developed optimized MySQL database and documented APIs using OpenAPI specifications
- Stack: Python, Flask, MySQL
